TAJIMA DG15 BY PULSE

Take your embroidery designs anywhere with **Tajima DG15 by Pulse!** All of the industry leading features and functionality you need to succeed are now accessible from your mobile device, changing the way you operate your business. Create, manage and browse your designs from multiple devices through the all new PulseCloud service and Dropbox integration. Whether you design from a desktop computer or use the Variable Data WebApp on your tablet to create multiple designs with ease, you'll always be able to access your DG15 designs with the swipe of a finger.

Additional features that build upon our industry leading Vector Based Embroidery engine have created exciting new design possibilities with a variety of effects and hyper-detailed editing capabilities. Take advantage of DG15's new Fill and Slice options, giving you more flexibility to perfect your vision. DG15 is optimized with touch-screen support and superior anchor point, monogram and sequin functionality.

Make the seamless transition to Tajima DG15 by Pulse and capitalize on the innovative new digitizing tools and features, all implemented to speed up your design process and increase design quality.

Pulse is proud to introduce the all-new **PulseCloud** in conjunction with DG15. Build and browse your online portfolio with constant access to your designs from your mobile device.You can even create new designs using templates. Moving technology to the cloud opens the door for various mobile and social possibilities, enabling you to take your business on the go and access your important files securely on multiple devices.

Send to machine

Apparel decoration businesses that implement PulseCloud into their design and management processes will quickly see the benefit both in terms of profitability and efficiency. PulseCloud also lets you keep an eye on machine status and job queues as they sew out as well, helping management stay up to date on production status when not on the floor. You can also send designs to your machines directly from your mobile device.
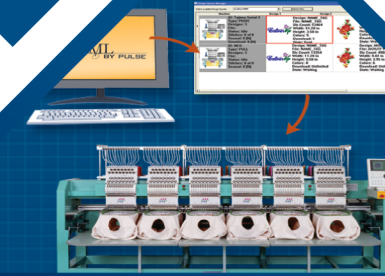

VECTOR BASED EMBROIDERY

DG15's integrated drawing tools ensure optimal design quality by working with your products in vector form.
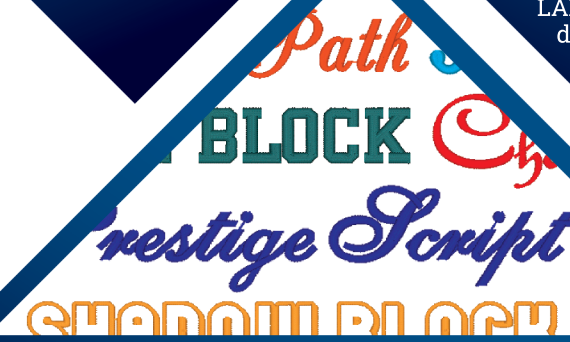

IMPORT VECTOR GRAPHICS

Import artwork from Adobe® Illustrator® and CorelDRAW® directly into DG15 while preserving the vector points and original colors.
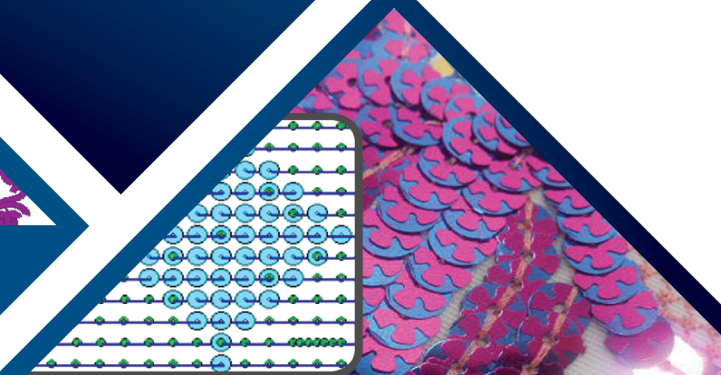

TAJIMA

Only DG15 provides exclusive support for Tajima LAN-enabled embroidery machines including displaying messages on the controller and optional barcode support.

FONTS

Choose from an extensive collection of professional-quality embroidery fonts with automatic kerning, closest-point connection and automatic outlines.

LASER / SEQUIN CHENILLE / RHINESTONE

Easily create exciting multi-media designs using a wide array of embellishment techniques including Sequin, Chenille, Rhinestone and Laser.

STITCH EFFECTS / QUALITY

Enhance your designs using specialized stitch effects. Our best-in-class stitch quality is unrivaled in the embroidery industry.
